

PYRAsense02

A new family of pyranometers with diagnostic features and tilt sensor

INTRODUCTION

PYRAsense is our new family of pyranometers that brings solar global radiation measurement to a higher level! Depending on the model and according to ISO 9060:2018 and WMO (World Meteorological Organization) recommendations, they are classified as:

- "Spectrally Flat" Class A (High quality)
- "Spectrally Flat" Class B (Good quality)
- "Spectrally Flat" Class C (Moderate quality)

The pyranometers are based on an accurate thermopile sensor and have been designed to meet multiple needs: from the best economical solution for measuring solar efficiency (Class C) to the solution for those applications where the best possible performance is a must (Class A).

FEATURES

Internal diagnostic sensors

To measure temperature, relative humidity, and pressure.

You can keep an eye on the operating condition of your pyranometer and predict any maintenance work in advance, thus always ensuring reliable measurements.

Integrated bubble level

To ease horizontal positioning during installation.

Moreover, the pyranometer can be equipped with an optional tilt sensor which allows continuous monitoring of the correct installation.

Protection screen

To resist UV solar radiation.

CONFIGURATION & MEASUREMENT

The sensors

Using the PC application software **DATAsense**, it is possible to configure the sensor (e.g., Modbus parameters, measuring range for the analog output, etc.), monitor the measurements in real time and save the values detected during the connection in a file.

RS485 Modbus-RTU isolated output + optional additional analog output

Configurable 0...10 V, 0...5 V, 0...1 V, 4...20 mA or 0...20 mA.

The irradiance range

It is configurable for the analog output.

Calibration report

The pyranometers are supplied factory calibrated according to ISO 9847:2023 (Type A1) standard and with an individual Calibration Report

SMART TECHNOLOGY

Internal diagnostic sensors to keep operating conditions always under control

LOW MAINTENANCE

Thanks to diagnostics, you always know when you need to take actions.

Average life span greater than 10 years

ACCORDING TO THE STANDARD

Spectrally Flat Class B according to ISO 9060. WMO recommendations & IEC 61724-1 requirements fully compliant

EASY TO SET UP AND QUICK TO INSTALL

Integrated bubble level and optional tilt sensor to ensure accurate installation in any position.

Configuration and real time data monitoring via software

GREAT FLEXIBILITY

RS485 Modbus-RTU output galvanically isolated + optional analog output, user configurable

ACCURATE AND RELIABLE
